

Heytea menu

Looking for the newest HeyTea menu and prices? If yes, then You're in the right place. As a longtime tea lover, I always turn to a reliable guide before ordering, and official 2026 menu is exactly a correct menu covering fresh fruit teas, cheese teas, [milk teas](#), matcha drinks, and other classic drinks in one entire menu. [HeyTea Menu USA](#) list drink details, calorie information, and drink sizes, so accurate details and important details are never missing. I trust the price list for updated and verified prices since old rates across websites and in-store listings rarely match. My favorite item is the Coconut Mango Boom, alongside the Triple Supreme Matcha Latte and Matcha Latte, both rich matcha creations and fruit blends from this premium tea brand. The cheese cloud drinks pair perfectly with boba and toppings, while signature milk teas, hot tea selections, and Superfruit Tea round out the menu items. With customization options, quality ingredients, and the Heytea [Nutrition guide](#), every visit to the store and order online delivers truly delicious options and the right drinks. This menu guide never disappoints.

beverage, whether it's fruit teas, milk teas, or matcha drinks, into something more personal. On the HeyTea Menu USA, these drink toppings, add-ons, and customization options give you real freedom to experiment. Matcha Cloud brings a nice earthy taste that pairs beautifully with lighter lattes, while Grapefruit Pulp adds a nice tangy taste to already vibrant fruit teas. Coconut milk jelly stays soft and chewy, making any crunchy drink feel more balanced, and sago works the same way; its small jelly-like texture makes people keep coming back for it. Among all the options, Brown Sugar Bobo remains the most popular, offering a warming, enriching addition to milk-based drinks, and now with Matcha Jelly and Cheese Cloud joining the lineup, there's genuine variety here. Every extra is really about adding flavor, extra flavor, taste, and texture, with calories clearly listed so you always know exactly what you're adding to your cup.
